PROFILE

BCA student currently working full-time while building software on the side. Three years of operations and data-entry work taught me to be accurate and fast under deadlines; the last year I have put that toward web development and AI. I have shipped and deployed four projects on my own, and I am currently building Jarvis AI, a personal assistant with memory, voice input, and task automation. I work across HTML/CSS/JS, Node.js, and LLM APIs (Gemini, Groq, Ollama), and I am looking for a role or internship where I can keep building real things.

PROFESSIONAL EXPERIENCE

Store Executive / Record Keeper | Fashion Smith Sourcing Pvt. Ltd., Gurgaon *May 2025 — January 2026*

- Maintain inward-outward stock records for fabrics and trims across the production cycle.
- Handle bill, stock, and account data entry in Tally and Excel.
- Manage ITC4 data, raise purchase orders, prepare challans, and track post-shipment revenue.

Executive | DS Solutions Pvt. Ltd. *Nov 2023 — Oct 2024*

- Entered customer and bank data on HDFC's official partner portal.
- Completed SPE, DPE, and TSR entries to company compliance standards.
- Trained new hires and consistently beat monthly targets.
- Won the Half-Yearly Award for Outstanding Performance.

Field Supervisor | GML Infra Pvt. Ltd. *Mar 2023 — Oct 2023*

- Supervised a 12-person team on telecom infrastructure installations.
- Wrote daily progress reports and coordinated resource allocation.
- Kept projects on schedule without compromising quality.

PROJECTS

Jarvis AI — Personal AI Assistant (In Development) *TypeScript, Node.js, Gemini, Groq, Ollama*

- Building a personal AI assistant with persistent memory, voice interaction, and task automation.
- Designed a project-workspace system to manage multi-session context and chat history.
- Code: github.com/Karthik-2102

Verma Enterprises — Business Website [Live Site] *HTML5, CSS3, JavaScript, Node.js, Vercel*

- Designed and deployed a full responsive business website from scratch, live in production on Vercel.

Calculator App [Live Demo] *HTML5, CSS3, JavaScript*

- Built a fully functional calculator with keyboard support, deployed on GitHub Pages.

Digital Clock [Live Demo] *HTML5, CSS3, JavaScript*

- Real-time digital clock with date and day display, updating every second.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React (basics)
Backend: Node.js, Express, Python, TypeScript
Database: MongoDB, Supabase
AI / ML: Gemini API, Groq, Ollama
Tools: Git, GitHub, VS Code, Postman, Vercel
Business Tools: Tally, MS Excel, Google Sheets, MS Word

EDUCATION

Bachelor of Computer Applications (BCA) *In Progress*
Manipal University
